

Germany Study Tour 2018

for Science and Technology, June 2018

36 students from the AEng, AScISD, AScNSA and ASci programmes participated in a 10-day study tour of the city and surrounding areas of Munich in Germany. In addition to various technical locations and visits with guided tours, students had an opportunity to learn about the culture in this part of Germany.

After an introductory historical tour of the city, in the following days students visited the "air-side" of Munich Airport, Siemens Headquarters, Erdinger Brewery, the heights of the Zugspitze mountain, the fairy-tail castle of Neuschwanstein, the Deutsches Museum, and the Dachau Concentration camp used in the Second World war (1939 to 1945). During free-time in the evenings and other periods, students explored the food and cuisine of Munich, the shopping and the night-life.
