

LABORATORY TRAINING AT THE OPEN UNIVERSITY OF HONG KONG FOR AScES AND ASCI STUDENTS

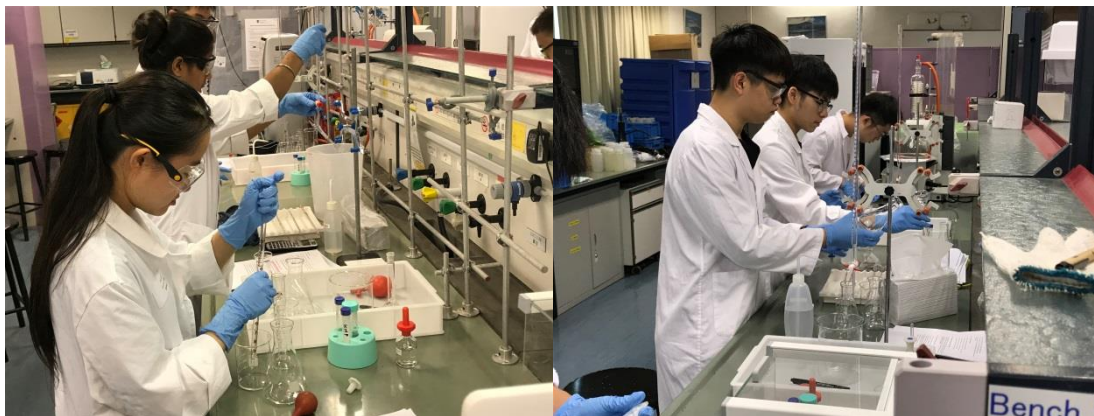

On October 13, 2017, AScES and ASCI year 1 students participated in a laboratory practice at The Open University of Hong Kong to understand the basic setting and safety issues in a modern laboratory. Students also have chance to practice essential skills in analytical chemistry and determine the concentration of acid, alkaline and vitamin C in unknown samples through the method of titration.

Students were working on their own benches.

Students were weighing samples and rinsing burette under the guidance of instructors.

Students were preparing solutions for titration.

Some laboratory facilities and equipment's in OpenU Lab.
