

## A Visit to the CLP Business Centre GREEN<sup>PLUS</sup> Gallery in October 2012

To explore the practicalities beyond the concepts and structured knowledge acquired in the classroom, a group of AScES and AEng students visited the CLP Business Centre GREEN<sup>PLUS</sup> Gallery in Sham Shui Po on the 31<sup>st</sup> of October 2012 in order to learn good industry practices of energy management presented by professional experts from CLP - the major energy provider in Hong Kong.

In the classroom, our students learned about environmental protection and sustainability, within which energy efficiency is one of the major concerns. In the visit, they

were showcased the latest renewable energy technologies implementations in Hong Kong, as well as an array of energy efficient equipment and appliances designed for both household and business applications. Besides, our students were also introduced the benefits of effective energy management which help monitor energy usage, identify energy saving opportunities, and reduce energy costs, while raising productivity and creating better living and working environments.

Energy efficiency
