

Visit to Hong Kong International Airport

for AScaOAL Programme, Division of Applied Science and Technology, Community College of City University

On 26 March 2015, 25 students from Associate of Science in Airport Operation and Aviation Logistics (AScaOAL) visited the Hong Kong International Airport (HKIA). The visit, co-organized by the Corporate Communications of Airport Authority Hong Kong and Mr. Andrew Yam, Lecturer at the Division of Applied Science and Technology, consists of tours of Terminal 1, Integrated Airport Centre and the apron of HKIA. From this valuable experience, students have gained concrete ideas of the daily operations of airport management, the structure and functions of the Airport Authority, the process of contingency management, the layout of airport concourse, the midfield development, and the future development of the airport.
