

# AST Summer Internship in Environmental Protection 2017

Eleven AScES (Associate of Science in Environmental Studies) students joined the 8-week summer internship provided by some green groups and NGOs this year. They are enriched with conservation knowledge and practical skills.

AU Tsz Kin (ES 1) joined an organic farm, from which he will learn the concepts of organic farming and how this practice will be in harmony with nature. He will also assist the guiding events.

CHAN Hiu Yee, CHEUK Long Fung, CHIU Tsz Ying and LIU Yu Kwan (all ES 1) joined the Tai Po GeoHeritage Centre. They are all interested in conservation of the geological resources in HK. They have to carry out research in different GeoAreas too.

CHAN Pui Yi, LEE Kwun Fung, LEUNG On Sang, SIU Wing Hei and TSANG Kwong Kit (all ES 1) assisted another organic farm for various programmes. Apart from organic farming, they all learn how to make compost. Students have to design some environmental education programmes so as to promote the organic concepts to the general public.

TAN Kenneth (ES 2) is interested in butterfly conservation and that's why he joined Fung Yuen Butterfly Reserve. He assisted the propagation of larval food plants, promotion of butterfly conservation via workshops and seminars.
