

Visit to Hong Kong International Airport

for AScaOAL Programme, Division of Applied Science and Technology, Community College of City University

On 14 October 2016, 39 Year 1 students from Associate of Science in Airport Operations and Aviation Logistics (AScaOAL) visited the Hong Kong International Airport (HKIA). The visit was led by Mr. Andrew Yam, Lecturer at the Division of Applied Science and Technology of CCCU and hosted by the Airport Authority Hong Kong.

The visit consists of a briefing of the Third Runway System and environmental initiatives of HKIA, a tour to the Integrated Airport Centre and the apron. From the comprehensive demonstration over two hours, students learnt more about the daily operations of airport management, the ramp operations, and the future development of the airport, etc.
