

AScAOAL Vancouver Flying Programme 2017

With the sponsorship from the Community College of City University (CCCU) and the Division of Applied Science and Technology (AST), a group of four students from the programme Associate of Science in Airport Operations and Aviation Logistics (AScAOAL) attended a short pilot training in Vancouver, Canada in the summer 2017. The training at Sea Land Air Flight Centre includes 10-hour flying experience, pre-flight and post-flight briefings and ground school in aircraft operations. By having their ever first experience of controlling an aircrafts, the students are more dedicated to pursue their career goals towards pilot and other aviation professions.
